

Feeding and Water Recommendations for Large Breed Puppies:

We feed our puppies NutriSource Chicken and Rice. Large Breed Puppy.

They get about $\frac{3}{4}$ to one cup per feeding three times a day. Increase the amount as they grow.

If you are going to introduce a new puppy food, please add it slowly over 10 to 14 days mixing with the NutriSource.

If you have any questions please refer to the information on the dog food directions and/or your vet.

We highly recommend bottled water for the first week, then mixing with your tap water for a while longer.

Water that is chlorinated, such as city water, can upset their tummies.
