

Feeding and Water Recommendations for Small Breed Puppies:

We feed our puppies NutriSource Chicken and Rice. Small Breed Puppy.

They get about one to two tablespoons per feeding three times a day or free choice grazing. Increase the amount as they grow.

If your puppy is not eating you might try some of these options: Canned puppy food, cooked chicken breast, cooked ground beef (fat rinsed off) or baby food. Just make sure they eat!

If you are going to introduce a new puppy food, please add it slowly over 10 to 14 days mixing with the NutriSource.

If you have any questions please refer to the information on the dog food directions and/or your vet.

We highly recommend bottled water for the first week, then mixing with your tap water for a while longer.

Water that is chlorinated, such as city water, can upset their tummies.
